

## SpeedForSale.com's Supra VIN tag checklist

Using this checklist, locate and take pictures of each of these VIN tags and submit the pictures to us when you upload/send the rest of the pictures of your Supra. This is VERY important!

1. **Hood:** located on the front right of the hood, where your right hand would be when raising the hood.

2. **Front driver's fender:** When you have the hood popped, it's located on the driver's side front fender near the firewall.

3. **Front passenger's fender:** When you have the hood popped, it's located on the passenger's side front fender near the firewall.

4. **Front impact beam:** located behind the front bumper. To see it, pop the hood and look down in the area between your front bumper and radiator support where your factory coolant overflow tank is located (if you have an aftermarket upper radiator/intercooler valence panel you'll need to remove it) and the VIN tag is located on the back of the impact beam. The impact beam is the silver cross-bar attached to the front frame rails that has the large Styrofoam piece in front of it. The VIN tag is just below the support piece with holes in it. Please make sure this tag is as clear as possible, and you may need a flashlight to help with lighting!

5. **Firewall Stamp:** This is NOT a tag/sticker, it is etched / stamped into the metal. It is located underhood on the passenger firewall, just beside the black 'DIAGNOSTICS' box on the passenger side firewall and directly behind the turbocharger(s). It should start out with JZA80 – followed by the last few numbers of the VIN number.

6. **Front dash beam:** This is NOT a tag/sticker, it is a metal tag visible from outside the car. It is located on the driver's side of the dash, where the windshield meets the dash/firewall area. You can see it by standing outside the car on the driver's side windshield area, and looking down through the glass at the bottom.

7. **Driver's door:** located on the driver's door when you open it. This is not a small VIN tag, but rather a large information sticker that also has the VIN number on it.

8. **Rear driver's quarter panel:** located on the door jamb when you open the door near the door latch.

9. **Passenger's door:** located on the side of the passenger's door.

10. **Rear passenger's quarter panel:** located on the side of the passenger's door jamb.

11. **Rear hatch:** located on the back right side of the hatch...where your right hand would be when raising the hatch.

12. **Rear impact beam:** located behind the rear bumper. To see it, lay on the ground near the exhaust tailpipe and look up above the tailpipe toward the middle of the car behind the rear bumper to see the rear impact beam, which is similar to the front impact beam except it's black and may have surface rust. On 1993-95 models the VIN tag is located on the driver's side of the rear impact beam closer to the tailpipe. On 1996-98 models the VIN tag is located more toward the center/passenger side of the beam.
